

Town of Hampton, New Hampshire

Capital Improvement Plan – Public Works Department

WWTP Upgrades Phase 3 Projected Cost 2014 - \$995,000

Odor Control – 1

In October 2011 the Town contracted with GHD, Inc. for an Odor Control Study. They identified improvements that could be made at the WWTP that could be done in several phases. Phase 1 would seek to control the odors from the Sludge Tanks, Dewatering Room and the Dewatered Sludge Bays.

The solution recommended would be an Activated Carbon System to be located just north of the sludge bays.

Cost Estimate	
Physical Improvements	\$600,000
Engineering & Permitting	\$200,000
Total =	\$800,000
